TITLE: A Model Dormitory Complex for Northwestern University towards Quality Services.
Year: 1994
Acc. No.: 660114
Abstract: The major objective of this study was to determine what dormitory may be recommended to operate at Northwestern University.

The research employed the descriptive analysis method of research with the questionnaire as the main tool in gathering data substantiated by unstructured interviews conducted to boarding house operators and dormitory owners around the University. The questionnaire was divided into two parts: personal data of the respondent. The different aspects of a feasibility study.
