AUTHOR: RAMOS, PEDRO S.
TITLE: Compatibility of Language Proficiency to Academic Performance of Six Pupils.
Year: 1997
Acc. No.: 660068
Abstract: The major objective of this research is to determine the Compatibility of Language Proficiency and Academic Performance of Grade Six pupils in the Division of Laoag City for the school year 1995-1996.

Specific Objectives:

1. To determine the language proficiency level in Filipino of Grade Six Pupils in the division of Laoag City.
2. To determine the language proficiency level in English of the Grade Six pupils in the division of Laoag City.
3. To determine the academic performance level of the respondents in the following subjects:
   a. Heograpiya, Kasaysayan at sibika
   b. Edukasyong pantahanan at pangkabuhayan
   c. Musika, sining at edukasyon sa pagpapalakas ng katawan
   d. Science
   e. Mathematics
4. To determine the relationship between language proficiency in Filipino and academic performance level of the pupils in MSEPK, Hekasi and EPP.
5. To determine the relationship between language proficiency in English and the academic performance of the pupils.
6. To ascertain the Compatibility of Filipino and English as media of instruction in fostering a well-balanced academic performance of the pupils.

Methodology:

The study employed the descriptive research method with 12 schools and 442 Grade VI pupils selected as respondents through random sampling. Result of the Division Achievement Information System of Laoag City. The data were described and analyzed using the mean, standard deviation, mean percentage score, and a Pearson or Product
moment correlation technique to determine relationship between variables. The level of significance for interpretation evaluation of the Null hypotheses of the study was set at (.05 and .01)
