Title: FIRE SUPPRESSION AND INVESTIGATION SERVICES OF THE BUREAU OF FIRE PROTECTION
Year: 2017
Accession:

Abstract: This study aimed to determine the level of awareness of three groups of respondents on the services of the Bureau of Fire Protection in Metro Vigan, Year 2016.

The respondents were composed of Municipal Officials, Barangay Officials, and Barangay Tanod. A validated questionnaire made by the researcher was used to gather the data. The data were analyzed and interpreted with the use of frequency and percentage and weighted mean.

Results of the study showed that majority of the respondents belong to the age bracket of 21-30, male, and married. Most of them are college graduates and are employed as barangay tanods. Majority of the respondents perceived that the level of their awareness regarding prevention services and suppression and investigation services is much aware. There is shortage of equipment in each municipality of Metro Vigan. Members of the Barangay Tanod are very much aware in prevention, suppression, and investigation services of BFP. There is a shortage of equipment in accordance to the ideal number of equipment in each municipality.

With result of the study, the following are strongly recommended; The BFP may adopt the developmental plan to enhance their services and to keep the community aware in their prevention, suppression, and investigation services. The Municipal officials, barangay officials and barangay tanod should attend seminars and workshops for them to be updated in fire prevention and suppression services provided by the BFP.
