Title: “Social Repercussions of attrition: It’s Impact to the guidance Program of the Bacarra National Comprehensive High School”.
Year: 1999
Acc. No. 660710
Abstract: The Problem:

This study aimed to determine the social repercussions of attrition and its impact to the guidance program of the Bacarra National Comprehensive High School.

The following were the specific problems answered in this study:

The descriptive survey was used by the researcher in this study the data were gathered through the use of the interview and was supplemented by the Likert-5 point scale questionnaire. The data were presented in tables and were statistically interpreted through the use of frequency, percentage, Pearson r, mean and mode.

The three schools are adequate in textbooks and references as shown in Table 7.
